

## Bios Update ECS B560H6-EM Installation Guide (EN)

Bios update of the mainboard B560H6-EM.

The execution of the update optimises the general system stability.

### Note!

Please make sure that you have closed all programs (especially applications that are active in the background) before executing the update process.

Never switch off the PC during a BIOS update!

### +++Installation instructions+++

Please proceed according to the following scheme:

1. Unzip the downloaded file **bios\_b560h6-em\_v21.zip** into a directory of your choice on the hard disk.
2. After unpacking, change to the directory **1\_BIOS** in the Windows interface and start the file **Flash.bat** by double-click.
3. Confirm the following security message with "Yes".
4. After the flash process is complete, restart your PC if the unit does not reboot automatically.
5. Now change to the **2\_EC** directory on your hard disk under the Windows interface and also start the **Flash.bat** file by double-click.
6. Confirm the following security message with "Yes".
7. After this flash process is also completely finished, shut down the computer and disconnect it **(important!)** from the complete power supply for at least 3 minutes, e.g. by pulling the power plug.
8. Finally, restart the computer so that the changes take effect in the system.

### Important:

Medion AG accepts no liability whatsoever for any data loss or hardware or software errors that occur as a result of the update. The customer acknowledges this when performing the update.
